## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

*The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.*

### *Drawings*

Applicant should ensure that (1) all reference characters in the drawings are described in the detailed description portion of the specification and (2) all reference characters mentioned in the specification are included in the appropriate drawing Figure(s) as required by 37 CFR 1.84(p)(5).

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 3, the recitation "such as screw or couplings, etc." is deemed vague and indefinite. Clarification is requested.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1- 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (US 5,092,229) in view of Mendelson, et al. (US 6,450,361). The patent to Chen discloses the claimed subject matter except for the cooker having at least two joining means and a handle. The patent to Mendleson, et al. discloses that it is known in the art to have a cover with a handle (35) and at least two joining means (7). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided the cooker of Chen with a handle and at least two joining means as opposed to one in the manner suggested by Mendelson, et al. in order to make the cooker fully secure and into an integral and portable body when necessary. Regarding claims 2 and 3, note sealing ring (22) of Chen in Figs. 15-19.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over the art applied to claim 1 above, and further in view of Barrow (US 6,259,068). The patent to Barrow discloses that it is known in the art to have provided a partition board (36) inside a cooker bowl. It would have been obvious to one having ordinary skill in the art at the time the invention was made to

have provided the cooker bowl of Chen with a partition board installed inside as suggested by Barrow in order to separate the cooker bowl into at least two parts.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents are cited for further teachings of devices whose structure is similar to that instantly disclosed.
